This course must be taken at Minnesota State University, Mankato either face-to-face or online.

\*\*Indicates this course is a prerequisite for application to the program.

#This course is offered online during summer sessions only, is offered face-to-face during the fall and spring semesters, and may be offered at the 7700 France Campus in Edina.

@This course must be taken at Minnesota State University, Mankato either fall or spring semester.

Application for admission to the Athletic Training Major at the junior-level is a selective process, not all students that apply will be accepted. Due to accreditation standards the total number of students accepted into the program at the junior-level will be limited. The selection process is competitive and is based on the students: 1) cumulative GPA and prerequisite GPA, 2) completion of the general education prerequisites, (as listed below), 3) completion of the required major courses, (as listed below), 4) accumulation of up to 100 hours of pre-athletic training level observations in the Minnesota State Mankato athletic training room, and observation and evaluation of performance during those observation hours, 5) letters of recommendation and a formal interview, and 6) compliance with established technical standards for physical, cognitive, and attitudinal abilities that an entry-level athletic trainer must possess. See athletic training program director for specific details.

A minimum cumulative GPA of 2.75, on a 4.00 scale, is required as an admission standard. An application packet may be obtained from the program director during spring semester and must be completed and returned by **May 1st**. Transfer students must meet all application requirements prior to application. The following prerequisite courses (HLTH 210, HP 140, 341, 348) must be taken on campus, remaining prerequisite courses may or may not fulfill educational competencies of the program and must be approved by the program director as acceptable transfer courses prior to application to the program. Note: The student must take the Minnesota First Responder qualified section of HLTH 210 as a program requirement. In addition, a student possessing current First Aid and CPR certification, with AED training, may waive HLTH 210 as an application requirement but must still take HLTH 210 during his/her first semester following admission to the program.

Application for qualified candidates takes place at the end of each Spring semester (only), therefore transfer students from this institution (Inver Hills Community College) would need to transfer to Minnesota State University beginning Spring semester in order to complete all on-campus prerequisite courses and observation hours.
