

Tracking Your Progress Toward Graduation Students can at anytime review their degree audit report system report (DARS report), within their *eservices* account, to identify general education and major courses completed or remaining. Students requiring advice on General Education requirements should visit with the College of Allied Health and Nursing Student Relations Coordinator (Shirley Murray, MS, LISW, Myers Field House, Rm 124, 389-5194, shirley.murray@mnsu.edu). For advice on major coursework, the student should consult with their major advisor. Prior to your anticipated final semester, students should declare their intent to graduate (complete form at campus hub). The purpose of this audit is to identify any potential issues or missing courses that would prohibit graduation.
